

Prior Lake Chiropractic

Prior Lake Chiropractic improved their phone system and Internet speeds with Nuvera.

Prior Lake Chiropractic's Challenge

Prior Lake Chiropractic is a conveniently located health center in downtown Savage featuring two chiropractors who are trained on the latest chiropractic treatments and technologies. They and their staff have a passion for helping their clients find their best path to wellness. In practice as well as online, the doctors strive through excellence through superior patient treatment, education, and satisfaction. In order to provide their patients the best experience, they reached out to Nuvera, with whom they already had a great relationship, to improve their phone system and Internet speeds.

Why They Chose Nuvera

Prior Lake Chiropractic needed a company and a system they could rely on. They already had a relationship with Nuvera and knew they would get the kind of assistance and product that would support their business' success into the future.

How The Product Has Helped and Their Experience With Nuvera

Nuvera's FlexVoice phone solution provided Prior Lake Chiropractic with an enhanced phone system over their outdated, inefficient system.

Not only did it provide a more reliable experience but FlexVoice offered a solution with no capital investments up front and no on-going maintenance fees associated with on-premise communication systems. In fact, their improved phone system cost about the same as their outdated one.

Nuvera's team worked with Prior Lake Chiropractic to match their specific needs to the features that would best help their business stay connected and competitive.

About Prior Lake Chiropractic

Industry: Health Care

Location: Savage, MN

Nuvera Solution: FlexVoice and Internet

Website: savagechiropractor.com

The office staff appreciated that the Nuvera technical team was very helpful while installing the new system as well as answering any questions after it was all set up.

With FlexVoice, Prior Lake Chiropractic knows they have on-going 24/7 support from the experts at Nuvera.

"The technical staff was very helpful."

- Darlene Walsh, Office Manager
